

Improve Patient Outcomes by being on the Cutting Edge of Regenerative Medicine

COURSE OBJECTIVES

- Learn two advanced ocular surface surgical techniques designed to improve patient outcomes and save valuable surgical time:

1. Reservoir Restoration procedure for Conjunctivochalasis (CCh) surgery
2. TissueTuck procedure for Primary Pterygium surgery

- Discuss the importance of ocular surface optimization prior to refractive cataract surgery.
- Practice the best intra-operative techniques for handling AmnioGraft.
- Review successful ways to encourage patients to proceed with the ocular surface procedures they need.

INSTRUCTOR

Curtis A. Manning, MD

Eye Care Associates of Nevada

Curtis A. Manning, MD is a comprehensive ophthalmologist with extensive experience in treating a variety of eye disease using state-of-the-art medical and surgical technology. His clinical expertise centers on the management of glaucoma, cataracts, and plastic surgery. Dr. Manning graduated from the Medical College of Wisconsin and completed an ophthalmology residency through the Air Force program in San Antonio, Texas. His clinical experience includes serving as the chief of ophthalmology at Southwest Medical Associates in Nevada and the Air Force Academy in Colorado. Prior military experience includes a tour of duty as an Air Force/NASA flight surgeon at Edwards AFB and deployment to Desert Storm during the Gulf War. He is certified by the American Board of Ophthalmology.
